

## Exclusive partnership Descroes and Duferco Logistique

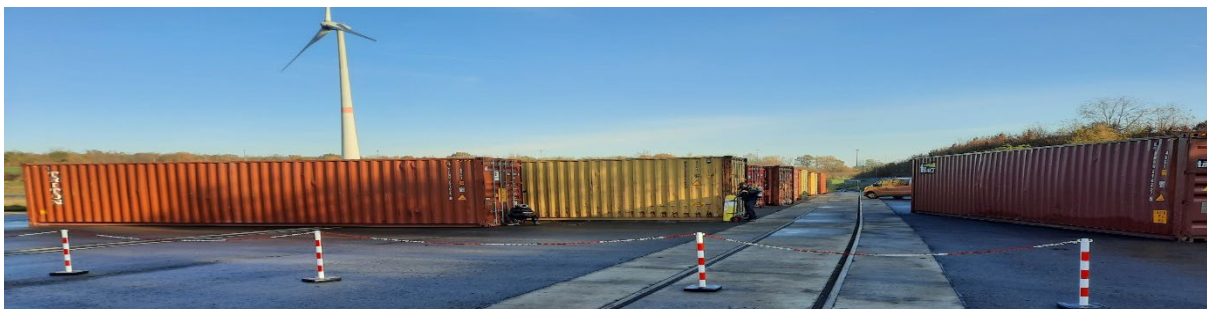

### Partnership

Descroes and Duferco, a well-known partner in the field of container transport, have entered into an exclusive partnership at the Garocentre Terminal, a freight transfer point in la Louvière, where Descroes now has its own fumigation zone.

### Fumigation zone Garocentre Terminal

Fumigations will mainly be carried out for export containers that are collected from the north of France and Wallonia in the fumigation zone of Garocentre Terminal. The zone is managed by Duferco while Descroes will carry out the treatments on site.

Thanks to the beneficial location of Garocentre Terminal in the industrial region of Hainaut, the fumigation zone is accessible by rail, waterways and highways. The containers will subsequently be transported to Antwerp, mainly by barge or train. Other destinations are also possible.

## Collaboration

This exclusive partnership enables Descroes to provide its customers in that region with a better and faster service and Duferco to expand its container transport by water and rail. Both parties are looking forward to a great collaboration!

## About Duferco Logistique

Duferco Logistique is an intermodal services provider based in central Wallonia, Belgium. Duferco focuses on, among other: inland door-to-door transport via barge, rail and truck, intermodal handling, storage and container services. Duferco's mission is contributing to a more sustainable entrepreneurship.
